Slot: B

Course Name: Artificial Intelligence

Course Faculty: DR. P. Rajaram

Project Title: Swarm Robotics based Multi-Agent Coordination System

Module Photographs: (3 photographs –Module Photo, Individual student contribution module work in the project and presentation image)

Project Description: (here you write what you did in this project (contribution) including Model Description

- AI-based multi-robot coordination system.
- Multiple robots work together as intelligent agents.
- Uses swarm intelligence for collective decision-making.
- Robots communicate with nearby robots.
- Performs task allocation among robots.
- Uses path planning for efficient movement.
- Provides obstacle avoidance and collision prevention.
- Supports target detection and area exploration.
- Works without depending completely on a central controller.
